

UNIVERSITY OF TENNESSEE COLLEGE OF SOCIAL WORK

SW 514 and SW 515: Human Behavior and Social Environment I & II
SW 515 Spring 2003: Wednesdays 5:30-8:20 p.m.

Instructor: Bonnie McCrickard
Office Hours by Appointment

Phone : 615-792-6644
E-mail: bamixon@yahoo.com

Code of Conduct

It is the student's responsibility to have read the College of Social Work Ethical and Professional Conduct code that is in the College of Social Work MSSW Handbook. www.csw.utk.edu

The Honor Statement

An essential feature of The University of Tennessee is a commitment to maintaining an atmosphere of intellectual integrity and academic honesty. As a student of the University, I pledge that I will neither knowingly give nor receive any inappropriate assistance in academic work, thus affirming my own personal commitment to honor and integrity. (Hilltopics, 2002)

Disability

If you need course adaptations or accommodations because of a documented disability or if you have emergency information to share, please contact the Office of Disability Services at 191 Hoskins Library (865-974-6087). This will ensure that you are properly registered for services.

Course Description

This two-semester course-sequence (SW 514 & 515) examines the major social science theories that inform the social work profession's understanding of human behavior in social systems. An ecological/systems framework, together with a developmental approach, is used to provide an interactional understanding of human behavior. The course-sequence opens with an overview of ecological/systems theory, social constructionism, and critical theory with an introduction to the diversity perspective. Social systems are examined across the course sequence looking at community, organizations, groups, families, and individuals within both traditional and alternative perspectives. Social and economic influences that are addressed include poverty, racism, sexism, and homophobia. Development across the life span is conceptualized as the interplay between nature and nurture where biological and psychosocial risks influence individual resiliency and environmental competence. A biopsychosocial perspective is used throughout the course to inform and examine the interaction between biological, social, psychological, and cultural systems.

HBSE I examines the life cycle, using an ecological perspective from, infancy through adolescence. HBSE II continues this examination from young adulthood through senescence. Both units consider the influence of different systems on the life cycle.

Course-Sequence Rationale

The content in this course-sequence focuses on human behavior in communities, organizations, groups, families, and life span development in the context of social structures, such as race, ethnicity, social class and gender roles. Because no one theory is adequate to encompass the human experience, students need to understand the explanatory power of various theories of human behavior within an ecological/systems framework. An ability to both critique and apply theory is a precursor for professional assessments of clients and client situations, as a guide for interventions, and for increasing client empowerment in their environments.

Course-Sequence Objectives

By completion of the course-sequence students are expected to be able to demonstrate (through course activities, assignments and/or exams):

1. Understand and use a social systems/ecological framework to analyze human systems at different levels of organization from communities to individual;
2. The ability to critique selected social theories from a diversity perspective;
3. The ability to compare historical and traditional perspectives of community and organizations with emerging alternative manifestations of community and organizations;
4. Knowledge of the similarities and differences in various types of family organization and their effects on the life course;
5. Knowledge of risk and protective factors in the development of resiliency across the life span;
6. The ability to identify the effects of ethnic, racial, cultural, economic, sexual orientation, and gender variables on individuals and families over the life span;
7. Knowledge of the interactive influence of biological, psychological, and social factors, including families, groups, organizations and communities, on human development and behavior;
8. Knowledge of the impact of environmental conditions such as class, poverty, oppression and discrimination on the promotion and inhibition of behavior and development.

Texts

Ashford, J.B., Lecory, C.W., & Lortie, K.L. (2001). Human Behavior in the Social Environment: A Multidimensional Perspective. Pacific Grove, CA: Brooks/Cole.

Kirst-Ashman (2000). Human Behavior, Communities, Organizations and Groups in the Macro Social Environment: An Empowerment Approach. Brooks/Cole.

Supplemental:

Schriver, J.M. (2001). Human Behavior and the Social Environment: Shifting Paradigms in Essential Knowledge for Social Work Practice. Boston: Allyn and Bacon.

Course Requirements

The instructor encourages active student participation in class. Students are expected to attend all classes, to prepare fully before each class, and to complete all assignments as scheduled. Class participation will count toward the course grade. Students will be expected to bring to class for discussion examples of concepts and materials from their own life and practice experience.

There will be three assignments in the course.

1. In class individual presentation
2. A final paper
3. Final comprehensive examination

Assignments & Grading

Assignment 1	Presentation	(20%)
Assignment 2	Final Paper	(40%)
Assignment 3	Examination	(40%)

The Grading Scale is as Follows:

A	=	93-100
B+	=	88-92
B	=	80-87
C+	=	77-79
C	=	70-76
D	=	65-69
F	=	64 and below

Assignment 1

In the first assignment you will be asked to select one of four developmental challenges (Substance Abuse, Mental Illness, Poverty or Domestic Abuse), and one of the four developmental stages presented in class (Late-adolescence (from HBSE I review), Young Adulthood, Middle Adulthood, or Late Adulthood). You will then be asked to apply concepts from the developmental stage and discuss the impact of the challenge on the normal trajectory of development. We will discuss the expectations of the presentations in more detail in class. It is expected that all presentations will include handouts and be made using PowerPoint software. A short orientation to PowerPoint will be held during the semester. Presentations should be relatively short (15-20 minutes) and are scheduled for the second week of each developmental stage (Adolescence & Young Adulthood, Middle Adulthood & Late Adulthood). This assignment represents 20% of your grade.

Assignment 2

You will be asked in the second assignment to conduct interviews with two individuals from different ethnic, racial and/or cultural groups who are in the same stage of development. You will then be asked to prepare a paper based on your analysis of these interviews discussing the impact of macro-level identification on individual development. Papers should compare and contrast these individuals' development utilizing the ecological perspective and theoretical concepts discussed in class. Papers should be 8-12 pages in length. A detailed outline for this assignment will be presented in class. This assignment represents 40% of your grade.

Assignment 3

A final exam will be given on the last day of class. This exam will cover material presented during this semester only and represents 40% of your grade.

COURSE OUTLINE

A. INTRODUCTION: PARADIGMATIC THINKING

1-15/1-25 Review of ecological and systems perspectives, risk resiliency and strengths perspectives

Discussion of Ethics of the Study of Human Behavior in the Social Environment

DISCUSSION OF INDIVIDUAL PRESENTATIONS & FINAL PAPER
