COURSE REQUIREMENTS/GRADING

Grading for this course will fall into five categories:

I.	Classroom Participation in Ethical Dilemma Discussions-----	10 points
II.	Quiz on Special Education and Educational Law Issues-----	20 points
III.	Social History/Psychoeducational Assessment-----	20 points
IV.	Sample Activity for a Hypothetical Group Session-----	20 points
V.	Project/Presentation-----	30 points

Total Maximum = 100 points

Assignment of Final Grades - The final course grade will be based on the following point totals: 92 – 100 points = A (Superior Performance)

87 – 91 points = B+ (Better than Satisfactory Performance)

82 – 86 points = B (Satisfactory Performance)

77 – 81 points = C+ (Less than Satisfactory Performance)

70 – 76 points = C (Performance well below standard expected of grad. students)

I. Classroom Participation in Weekly Ethical Dilemma Discussions (10 points):

The final 30 minutes of 4 class periods will consist of group discussions of ethical dilemmas that school social workers may encounter. At the beginning of the semester the class will be randomly divided into small discussion groups. Each week the groups will be given a vignette to discuss for about 15 minutes and then give a brief verbal summary of the group's position to the rest of the class during the final 15 minutes. "Grades" of 0 or 1 point will be given each week based upon the extent that the student is present and makes meaningful contributions. (Additional 2 points given for attending all 7 classes).

II. Quiz (20 points):

This will be a brief multiple choice and/or short answer quiz assessing knowledge of Special Education Issues and Educational Law

III. Social History/Psychoeducational Assessment (20 points):

This will be a written assignment based upon observing a classroom demonstration of a social history interview with a parent and the administration of a psychoeducational assessment instrument. (Additional information will be provided in class.)

IV. Sample Activity for a Hypothetical Group Session (20 points):

Each student will “create” a hypothetical school-based group, summarizing pertinent information (number of students, ages, gender, type of problem or issue, etc.) in a typed description (1/2 to 1 page in length). On the back of the same page, the student will describe/detail a sample activity for the group, explaining exactly how to conduct the activity and the goal/reason for doing such an activity. Additionally, on the designated due date, each student will **bring to class copies of the assignment to provide to the other students and will bring the materials needed to do a brief (5 min.) demonstration of the activity with the class.** (Additional information will be provided in class.)

V. Project (30 points):

The project will be done individually, (though requests for 2-person-team projects will be considered) and will include researching a currently relevant issue/problem in the field of school social work and making a classroom presentation (approximately 10-15 minutes), which includes basic information/definition of the issue, pros and cons of potential/existing interventions, and a proposal for addressing the problem. The presentation should also address any potential ethical dilemmas unique to the chosen topic. Students will do a brief, but comprehensive literature review and fully explore the chosen area. Students will turn in a typed outline and bibliography, and **will bring copies of the outline and bibliography to distribute to classmates on the day of the presentation.**

The project grade will be separated into two components:

Outline/Bibliography	-	25%
Classroom Presentation	-	75%

Topics must be approved and each person must have a different topic.
