Course Description

This is a required concentration course. This course provides the foundation for clinical social work practice. Advanced knowledge and skills are developed in the areas of interviewing, the therapeutic alliance, risk assessment and case formulation. Particular emphasis is placed on the use of evidence-based treatments for specific mental health problems and populations.

Course Rationale

The course reviews several clinical theories supported by a significant evidence base. Emphasis will be placed on the development of skills in application of each of the selected practice theories including, developing a therapeutic alliance, case conceptualization, interviewing, and termination. Additionally, learners will identify and critically analyze evidence based practices in their field of practice. Finally, consideration of social work values and ethics in the application of all clinical practice theories will be integrated into skill development.

Course Competencies

By the completion of this course, the students are expected to be able to demonstrate (through course activities, assignments, and/or exams):

1. Explicate knowledge of selected evidence based clinical practice theories (CT/EBP C.3) (*content: cognitive behavioral, motivational interviewing, interpersonal counseling*)
2. Judiciously utilize the value base of the social work profession and its ethical standards in clinical practice with individuals (Values and Ethics C.1) (*content: NASW Code of Ethics, ethical principle, ethical dilemma analysis, ethical dilemma resolution strategies*).

3. Articulate clinical assessment with diverse groups of clients using evidence based assessment measures and methods (Diversity C.2; CT/EBP C.1) (*content: diversity assessment model, quantitative and qualitative assessment methods, case studies high lighting diversity in assessment*).
4. Describe culturally sensitive work with diverse client systems (Diversity C.2; Practice C.1) (*content: cultural competency, professional use of self, modify clinical interventions for implementation with diverse groups*).
5. Articulate and implement a plan for using the steps of evidence-based practice for improving clinical practice (CT/EBP C.4; Practice C.3) (*content: evaluation of research articles, apply the process of EBP through role plays and case-studies*).
6. Describe the use of evidence based clinical practice theories in assessment, treatment planning, case-conceptualization, and interviewing to resolve unique, ambiguous, value-conflicted, and complex client problems (Practice C.1; Values and Ethics C.1; (*content: application of research findings to clinical practice, assessment, treatment planning, interviewing, case-conceptualization, ethical dilemma analysis*)).
7. Critically analyze the role of social justice in clinical practice with at-risk populations (Populations at Risk and Social Justice C.2 (*content: utilize case studies of at-risk populations for clinical practice role play, analyze the social justice dimensions of evidence based clinical practices*)).

COURSE REQUIREMENTS/GRADING

The course grade will be based on five online quizzes, five worksheets, and one live observation done during a face to face session demonstrating one of the clinical practices taught in class, motivational interviewing, cognitive therapy, or interpersonal psychotherapy. A description of this assignment is available on BlackBoard, please review it prior to the first session and choose the practice you would like demonstrate. Students are expected to read the assigned articles/chapters thoughtfully and attend class sessions prepared to ask questions, make comments and add to the overall discussion. The course grade will be computed as follows:

Quizzes 5 @ 5 points apiece	25%
Worksheets 5 @ 10 points apiece	50%
Live observation	25%

Quizzes

Quiz 1: This quiz covers readings and class discussions related to: (a) application of the values and ethics of social work practice to clinical practice, (b) implementation of culturally sensitive practice, and (c) the role of social justice in clinical practice with at risk populations.

Quiz 2: This quiz covers readings and class discussions related to: (a) the theory underlying cognitive behavioral therapy (CBT) and (b) assessment and case conceptualization using a CBT practice framework.

Quiz 3: This quiz covers readings and class discussions related to: (a) implementation of CBT in clinical practice with populations at risk and (b) identifying symptoms indicating CBT as an appropriate evidence based intervention.

Quiz 4: This quiz covers readings and class discussions related to: (a) the theory underlying interpersonal psychotherapy (IPT) and (b) assessment and case conceptualization using a IPT practice framework.

Quiz 5: This quiz covers readings and class discussions related to: (a) implementation of IPT in clinical practice with populations at risk and (b) identifying symptoms indicating IPT as appropriate evidence based intervention.

Worksheets

Worksheet 1: This worksheet will cover readings and class discussions related to the Transtheoretical model of change which underlies the evidence based practice of motivational interviewing (MI). Students will consider a behavior they have changed in light of this model.

Worksheet 2: This worksheet will cover readings and class discussions related to: (a) implementation of MI with populations at risk and (b) assessment and case conceptualization using an MI practice framework. Students will watch a video and identify the pertinent elements of MI demonstrated in the video.

Worksheet 3: This worksheet will cover readings and class discussions related to: (a) identifying the “spirit of MI” demonstrated in a video of a counselor applying the practice using the Motivational Interviewing Treatment Integrity measures global ratings.

Worksheet 4: This worksheet will cover readings and class discussions related to the application of CBT to clinical practice with at risk populations by identifying specific elements of CBT through the video.

Worksheet 5: This worksheet will cover readings and class discussions related to the application of IPT to clinical practice with at risk populations by identifying specific elements of IPT through the video.

Live Observation

Students will select one of the three clinical practices covered in class, either MI, CBT, or IPT. The student will then role play a session with a simulated client demonstrating their ability to apply the chosen practice to assessment, case-conceptualization, and intervention.

EVALUATION PROCEDURES AND GRADES

- A (95-100) Outstanding/Superior. Exceptional performance. Consistently exceeds expectations.
- B+ (90-94) Very Good. Student consistently meets, and occasionally exceeds, normal expectations for the course.
- B (85-89) Good. Student consistently meets normal expectations for the course.
- C+ (80-84) Average. There is unevenness in grasping course content. Student is inconsistent in meeting normal expectations for the course.
- C (70-76) Poor. There is lack of understanding of course content. Student does not meet course expectations.
- F (69-Below) Very Poor. There is a lack of attendance or incomplete assignments. Course expectations are not met.
